### eCommerce

Empower your customers and increase efficiency with eCommerce! Sell your products to customers worldwide through a customized internet storefront. Distribution One will build you a complete online store that provides customers secure access to place their own orders. Both you and your customers will enjoy the benefits of increased efficiency, secure credit card transactions using an encrypted connection, automatic inventory updates, account information online and much more.

Based on the size of your inventory, the store allows customers to place items into a virtual shopping cart, or order from a simple order form. Orders are processed from your site automatically into V2.

Your store is completely customized to suit your needs. This system is implemented into your current website, or a professionally-designed website is developed for you. Complete Web hosting services are also available.

### Yahoo! Store Integration

Distribution One offers a complete integration to Yahoo Stores. This automates the backend integration process. Distribution One can import online Yahoo orders into V2 and also update in-stock quantity your website based on inventory changes in V2. Import online orders into V2 with the click of a button. Synchronization features for inventory automatically monitors inventory changes in V2 and updates itself on the website. Fulfill online orders easily with shipping integration via UPS, DHL, USPS or FedEx. Distribution One also includes credit card processing over secure payment gateway for processing customer payments.

### EDI

Many businesses require EDI in order to meet the needs of their customers. EDI transaction sets and compliances can differ from trading partner to trading partner in the supply chain. This makes compliance requirements unmanageable and costly without a good software solution. FMCG wholesalers and distributors need flexible, cost-effective, solution that can enable them to meet their customers' needs.

Distribution One's V2 for Retail Fulfillment EDI solution provide flexible options to deliver a user friendly, flexible and completely integrated solution necessary to meet your needs.
