

# FOCUS ON V2

## Blanket Orders

***Creating multiple ship dates for one line item has never been easier!***

After entering the item and total quantity, simply click on the blanket button. V2 will ask for the total number of shipments, and then will automatically calculate the quantity per shipment. Enter the number of days between each shipment, click go, and V2 will do the rest! All of the fields are editable so you can change shipment quantities and dates.

This feature is one of thousands included in V2, making it the most comprehensive and easy to use business management system for Wholesale Distributors! For more information about V2 and Distribution One give us a call or visit our website today.

Providing powerful business software  
for Wholesalers and Distributors.
