Do business better.

If you look up the word complexity in the dictionary, do you find your business model there? That's how it feels for many distribution companies – especially if your monthly transactions and SKUs number in the tens or hundreds of thousands. Under constant pressure to provide better customer service, increase inventory turns, and optimize transportation costs, you can't survive without a full range of enterprise functionality tailored to your unique requirements. To meet the challenge, you need a powerful enterprise solution that meets your definition of comprehensive – one that's designed specifically for complex distribution environments like yours.

Leverage experience.

At Infor™, our professionals – many with more than 25 years of experience – are helping companies like yours solve their toughest business challenges. That experience is built in to Infor ERP A+, a comprehensive solution designed specifically for distribution companies with complex business models. The solution is the undisputed leader among distribution companies using the IBM® System i platform. They appreciate its ability to handle their most pressing business issues.

Get business specific.

Infor ERP A+ is a full-featured client/server system that supports flexible, event-driven operations on the IBM System i. It provides a new way to run your business – an across-the-board core distribution solution that delivers increased efficiency and improved performance.

See results now.

Infor ERP A+ is a complete solution that is helping distributors worldwide strengthen their performance and drive strategic expansion. Easy to implement and use, the solution is helping customers see significant bottom-line business benefits such as:

- Improved cash flow
- Improved customer service
- Better forecast demand and optimized inventory levels
- Support for new value-added services
- Improved decision-making

- No more redundant, manual processes
- Minimized training
- Maximized productivity

If you want to do business better tomorrow, contact us today. We'll get you started.

Key features include:

- **Order entry** – Advanced order controls let you take advantage of complex ordering formulas while considering important factors such as average sale quantity.
- **Inventory control** – Efficient tools let you easily establish reorder points, print physical count sheets, and perform a variety of other inventory control processes. Vendor Managed Inventory tools help you handle off-site inventory managed by vendors with automated communication and reduced manual intervention.
- **Kit production** – Manage kit production more efficiently through innovative, automated tools for packaging and marketing products.
- **Purchase order** – Manage the purchase of both stock and non-stock orders.
- **Service warranty** – Streamline service and repair functions.
- **Warehouse management** – Whether it's product movement, receiving, shipping, picking, counting, or inventory adjustment, you gain an integrated solution for real-time management of warehouse workflow.

In addition to these key Supply Chain Management features, Infor ERP A+ encompasses the full range of integrated functionality you need to do business better at every level of your enterprise:

- **Financial Management** designed specifically for the unique challenges of operating multiple locations
- **Performance Management** for managing your business against your strategic goals
- **Supplier Relationship Management** for creating a more collaborative environment for you and your suppliers
- **eCommerce Tools** for doing business seamlessly with customers and suppliers 24/7
- **Customer Relationship Management** to help you enhance your service levels at every customer touch point
