Get business specific.

Designed to maximize speed and accuracy, Infor ERP FACTS can access and integrate data across an entire operation, thereby eliminating redundant, manual processes and streamlining business functions. Infor ERP FACTS features an intuitive, easy-to-use graphical interface that supports automation of the key processes that provide business value for distributors.

Supply Chain Management: As a distribution company, you sit at a critical intersection in the supply chain. This requires the efficient movement and management of goods and materials, in addition to flexible ways to foresee customer requirements and get ahead of the curve on demand and supply. Infor ERP FACTS provides the modules that can enhance the way you sell, source, and deliver goods to customers. Infor comprehensive modules include:

- Sales Orders
- Inventory Control
- Purchase Orders
- Warehouse Management

Enterprise Performance Management: Making informed business decisions is an essential part of making your company successful. The enterprise performance management capabilities in Infor ERP FACTS help you analyze key aspects of your operations and share this information throughout the enterprise. Key capabilities include:

- Sales Analysis
- Report Writer
- Pro Business Intelligence

Financial Management: Efficient, flexible, and accurate financial management is essential if distributors are to succeed in an environment of intense cost pressures and tightening compliance requirements. Infor ERP FACTS provides the modules that will enhance your financial management, including:

- Accounts Receivable
- Accounts Payable
- General Ledger

Business Management: For distributors, core processes like selling, building, and buying from suppliers deserve special attention. The business management capabilities of Infor ERP FACTS give distribution companies several tools to keep their day-to-day operations running smoothly and their relationships with prospects, customers, and suppliers on a sure footing. Comprehensive tools include:

- System Management
- Relationship Management
- Manufacturing Control
- Service and Repair
- Faxlink
- Archive
- Forms Management
- Job Cost
- API Toolkit (Application Programming Interface)

eCommerce: With today's Internet-based business environment, customers and suppliers are demanding that distributors do business with them 24/7. Infor eCommerce capabilities support around-the-clock, seamless transactions and access to key information, such as order status and product information. Key modules include:

- eCommerce Storefront
- Electronic Data Interchange
