

FOCUS ON V2

Item Import for Instant Quotes

Create a quote or order from an Excel Spreadsheet.

Your customer emails you a list of 75 different items with quantities to be quoted. That's a lot of data entry? Not with this standard V2 feature. All you need to do is simply copy the Excel listing of items and quantities, open the Customer Price and Availability program, and click the import button. Then, paste the list in the window and click process items and you're done! You can now turn this into a formal quote or even an order with a click of the mouse. The pricing will automatically be tailored for this customer.

This standard feature combined with the thousands also included in V2 makes it the most comprehensive and easy to use business management system for Wholesale Distributors! For more information about V2 and Distribution One give us a call or visit our website today.

Providing powerful business software
for Wholesalers and Distributors.
