Year company was founded: 1992
Total number of full time employees: 175

Release Information

Current Version Number as of January 2010: 6.1
New releases are made available: annually and semi-annually for the patch release

Accellos One Warehouse delivers a powerful, scalable and flexible real-time Warehousing Management System (WMS) for distributors.

Accellos One Warehouse has the power to help you:

- **Increase supply chain visibility.** Accellos integrates seamlessly with many popular accounting/order-entry packages and shipping systems to provide the warehousing link in a total supply chain solution. By integrating with leading accounting packages, warehouse automation equipment and shipping systems, you connect your warehouse to the rest of your supply chain. The seamless transfer of information between your systems means more efficient invoicing, order tracking and purchasing for your distribution operation.
- **Streamline your warehouse processes.** By using the latest in Radio Frequency (RF), RFID and barcode technology to automate your warehouse processes, you can find, pick and pack inventory in the most efficient manner possible. This means that you will be shipping the right items, in the right cartons, to the right customers, on time, every time.
- **Improve your customer service.** By giving your customer service staff, sales team and even your customers a window into the warehouse using web-based technology, you allow them to track and trace the status of inventory and orders resulting in fewer customer calls and better managed sales expectations.

Distributed through a global network of local partners, installations can be found across the world in both Fortune 500 distribution centers and smaller localized warehouses.

The benefits of implementing Accellos One Warehouse include:

Accuracy

- 99.9% accuracy
- Create a paperless warehouse
- Provide accurate, real-time validation of every warehouse function using handhelds, barcode and RFID technology
- Eliminate transcription and data entry errors with real-time data capture
- Minimize handling steps

Efficiency

- Support both FIFO and LIFO stock rotation
- Pick or track product by lot or serial number
- Track and report on dated product
- Maintain a perpetual, real-time inventory count
- Wave receiving and picking
- Control stock movement and replenishment
- Customized to fit with over 1,500 configurable switches
- ASN receiving

Customer Service

- Ship the right goods, on time, every time
- Generate compliance labels
- Create custom reports and pack slips based on specific client need
- Compile ASN-required data
- Increase accuracy and reduce customer service calls
- Allow your customer service reps to track and trace any and all orders
- Use the web visibility features to check the status of orders in real-time
- Open and monitor customer issues
- Web ordering
