Warehouse Management

Easy-to-use tools help you:

- Get a more complete picture of anticipated and received goods -- and improve the receiving process
- Advanced ship notices enable quick put-away of received items
- Track items that have been returned by a customer or received from a vendor as defective, as an over-shipment or "not as ordered"
- Establish and track multiple product stocking locations, including:
 - Stock, Defective
 - Over shipment
 - Tagged
 - Review
 - Display
- Improve customer service by setting order fulfillment priorities
- Assign a location status of either primary, secondary, floating, remnant, or in-process
- Sequence your delivery orders and/or transfers by shipper
- Download your shipping manifest to a PDA to electronically capture proof-of-delivery signatures
- Review tickets or receipts that have been processed, but whose material has not yet been "officially" picked or put-away
- Check the status of all:
 - Open sales orders (normal or credit sales)
 - Purchase orders (normal or returns)
 - Transfers (inbound and returns)

- Intuitive transaction checks allow the system to alert warehouse personnel whenever on-hand quantity might be inaccurate
- Integrated multi-carrier shipping management solution boosts productivity and controls shipping cost when you use:
 - UPS
 - FedEx
 - USPS
 - DHL
 - Spee-Dee
 - User-defined shippers

Warehouse Logistics

Helping you move more product for less.

From receiving and put-away to picking, replenishment, cycle counting and shipping, the Activant Eclipse helps strengthen customer relationships, reduce operating expenses and increase warehouse distribution efficiencies.

Whether you need to consolidate your warehouse processes, improve inventory visibility or prioritize warehouse activities, we can help you move more products for less -- all in a real-time environment.
