Of all of the places in your business where inefficient processes can do the most damage to your profitability, your warehouse leads the list.

A powerful range of features in the Activant Distribution Suite manages warehouse activities – including receiving, cross-docking, put away, picking, inventory adjustments, cycle counts, and much more.

Transactions affecting the warehouse are automatically generated and processed without re-keying information – saving time and reducing errors.

You can further streamline warehouse processes with Activant's fully integrated wireless warehouse management solution. This paperless warehouse solution brings a new level of accuracy to all warehouse processes, including receiving, cross-docking, put-away, adjustments, picking, cycle counting, and inventory operations. You can enhance customer service by ensuring you get the right products out on time, every time, while improving operating efficiencies through directed warehouse activities. For example, with the wireless warehouse management solution, you can save time by picking a single order, multiple orders for different customers, and transfer orders in a single pass through the warehouse.

Fully integrated with the Activant Distribution Suite, wireless warehouse management technology brings a new level of accuracy to all warehouse processes.

Benefits:

- Conduct wireless inventory receiving
- Conduct wireless inventory put-away
- Conduct wireless inventory picking
- Conduct wireless physical inventory/real-time cycle counting
- Utilize bar coding
- Utilize an integrated shipping manifest
- Conduct vendor managed inventory (VMI)
- Generate transfers between locations
- Utilize various inventory allocation methods
- Pick inventory for all available orders for a customer
- Conduct wave picking
- Conduct batch picking
- Conduct real-time cycle counting
- Generate warehouse performance reports
- Streamline warehouse process
- Receive immediate feedback
- Improve control over warehouse tasks
- Improve customer service by helping ensure customers get the right products out on time, every time
- Improve operational efficiencies through directed warehouse activities
- Conduct cross docking
