BCR Warehouse Management is a fully graphical application utilizing advanced technology. It is designed to run on most versions of Microsoft Windows including the latest version of MS 2003/2007 Server, XP Pro and Vista. Operations may be performed using scanning, keypad and touch screen input. BCR does not use 3rd party software for any of its modules.

BCR Software is built for the wholesale distribution industry and for **small to mid-sized** companies who want to take advantage of a full feature distribution software package at a great value while improving their ROI with advanced business tools. BCR Warehouse Management is fully integrated with all modules of the BCR Distribution Software.

### Main Functions of Warehouse Management:

- Purchasing
- Receiving
- Subsidiary warehouse fulfillment through primary warehouse
- Order fulfillment
- Bin management
- Put-away
- Lot tracking
- Serial number tracking
- Transfers
- Bar code management
- Business analysis
- Reporting
- Shipping management
