BMA Warehouse Management is a fully graphical application utilizing advanced technology and 4GL database. It is designed to run on most versions of Microsoft Windows including the latest version of MS 2003/2007 Server, XP Pro and Vista. BMA does not use 3rd party software for any of its modules including Payroll and Report Writer.

BMA is built for the wholesale distribution industry and for **small to mid-sized** companies who want to take advantage of a full feature distribution software package at a great value while improving their ROI with advanced business tools. BMA Warehouse Management is fully integrated with all modules of the BMA Distribution Software.

Main Functions of Warehouse Management:

- Purchasing
- Receiving
- Order fulfillment
- Bin management
- Put-away
- Lot tracking
- Serial number tracking
- Transfers
- Bar code management
- Business analysis
- Reporting
- Shipping management

RF Warehouse Tools:
